

ANNA'S PERSONAL NOTES

Sprint 3

Extra Meeting

Friday 13th April at 10:00

O'Briens Science Centre

1. My point: I know that the next feature we decided to develop is the data analytics one. However, what I suggest is to complete integration first so that we could have some bearable product. Otherwise we might end up just having many pieces of code but no working app. Integration should also be continuous.

Discussion: How to complete integration by Tuesday.

Action: Chen wants to draft a document on splitting integration into small tasks.

2. Data Analytics:

Action:

Task 23 - Chen

Task 24 - Peng

Task 25 - TBC

Task 26 - Anna

Further tasks to be allocated after the above ones are completed.

3. Testing - do screenshots and upload them **Action: All**

4. Tuesday practical: review meeting **Action: All**
