<p style="text-align:center">ANNA'S PERSONAL NOTES</p>

<p style="text-align:center">12 April 2018</p>

<p style="text-align:center">SPRINT 3 AGENDA</p>

<p style="text-align:center">O'Briens Science Centre at 9:00</p>

<p style="text-align:center">Present : Dr.A.Lawlor, P. Wicke</p>

<p style="text-align:center">Chen Shen, Peng Ye, Anna Ryzova</p>

1. Update all the features and backlogs and in the meeting we need to talk about what the rest features are.(Like CSS and Testing or any others) **Action: Chen**

2. Do we need to add a reviewing meeting in the end of the project?
   Action: Yes, 19th April 9:30

2. What features or tasks we need to do in the sprint3? (Allocation of Tasks) **Action: Anna - finish chart 4, grab what is left**

Dr.Lawlor's advice:

For the final Sprint 3 try to demonstrate how to use the Scrum process. Have a clear backlog, a simple chart to display. Break the features down into small tasks, talk about the priorities and who is doing what. Iterate on your prototype together. Burndown charts. Focused and shared planning. Some bearable application and each person changes it a bit. Shared database and prototype, working on each laptop. Fine-grained level.

What does it take to implement a feature?

First come first served.

Focus is not on the end result, plan features and execute the project.

Delegate the tasks.

3. Finally, what we need to submit to the teacher? (Both for group and individuals) **- TBC**
